

How to fix the Freesevers Space Full Problem and the ftp  
too many connections problem 421

---

# Freesevers Fixes

---

SEAN E. O'CONNOR 24 JUNE 2024

**Last week June 2024 Freeservers told me my storage space wall nearly full: Quota: 1090.6M used out of 1000.0M (109.1%) But my files are only 280 MB, nowhere near the 1GB server limit.**

FreeServers Customer Service  
FTP Status Alert  
To: Sean O'Connor

 **FreeServers** FTP Status Alert

▶ FTP Status Alert: [seanerikoconnor.freeservers.com](http://seanerikoconnor.freeservers.com)

 **Storage Space Is Nearly Full**

Your storage limit has been 90% reached. If you continue to upload files, you will reach your storage limit soon.

To increase your storage limit, upgrade your website by [clicking here](#) or calling 1-800-396-1999.

Alternatively, you can create more available space by deleting files.

**NEED HELP?**  
Your member name is: [seanerikoconnor.freeservers.com](http://seanerikoconnor.freeservers.com)  
[Click here](#) for your password.

FreeServers c/o United Online Web Services, Inc., A United Online Company, P.O. Box 649, Woodland Hills, CA 91365-0649

---

**I deleted ALL my files using the Freeservers file manager,  
but my quota on the server was still 796 MB**

---

# Next step was to use Freeservers tool to delete all the contents of my web site **WITHOUT** deleting the web site itself - just **ALL** the files.

# That worked! My quota went down to 982 KB with no files on the server except two default files.

The screenshot shows a web browser window with three tabs: 'Main Menu - FreeServers', 'File Manager - FreeServers', and 'File Manager - FreeServers'. The address bar shows the URL 'seanerikoconnor.freesevers.com/cgi-bin/util/fm'. The page header includes the 'freesevers' logo and navigation links for 'Main Menu', 'My Website', 'My Email', and 'My Domains'. A user is logged in as 'seanerikoconnor.freesevers.com' with a 'Logout' link. A yellow banner at the top right says 'Upload Files FASTER with FTP!'. The main content area shows the 'Current Folder' as 'http://seanerikoconnor.freesevers.com/'. Below this, it indicates '2 total files' and a quota of '982.3KB used out of 1000.0M (0.1%)'. A toolbar contains buttons for 'New File', 'New Folder', 'Upload', 'Rename', 'Delete', 'Move', 'Copy', and 'Choose a Destination...'. A table lists the files:

Filename	Type	Size	Last Modified
fscount.js	Text/js	124	06/23/24 14:49
main.html	Text/html	72	06/23/24 14:47

# Now use my automated web site sync program update web.py to put back all the directories and files again.

```
Terminal — updateweb.py —verbose — 290x68

```

# That worked! My quota is back to normal again!

The screenshot shows a web-based file manager interface for a user named seanerikoconnor. The interface includes a navigation menu with options like 'Main Menu', 'My Website', 'My Email', and 'My Domains'. A status bar at the top right indicates the user is logged in and provides a 'Logout' link. Below the navigation, there are links for 'My Account', 'View Site', and 'Help'. The main content area displays the current folder path and a quota status: 'Quota: 281.9M used out of 1000.0M (28.2%)', which is highlighted with a red box. The interface also shows a list of files and folders, including 'Art', 'CommunicationTheory', 'ComputerScience', 'Electronics', 'Finance', 'Images', 'Mathematics', 'mathax', 'ReadingList', 'Resume', 'Scripts', and 'WebPageDesign'. The file list includes columns for 'Filename', 'Type', 'Size', and 'Last Modified'. The file list shows 17 files, including folders and text/html files like 'error404.html', 'index.html', and 'StyleSheet.css'.

# And the total file size agrees with my own automated Python script total file size report from update web.py

# Solving FTP error in FileZilla when uploading .htaccess file

File Transfer Notes

## File Transfer Notes

FileZilla uses multiple FTP sessions. One session gets used purely to browse the server. The other sessions get used to do the file transfers. That way, you can always browse the server even during transfers.

For example, here is a simple car analogy: You order a pizza using your telephone (aka the browsing connection), then you hang up the telephone. Then the delivery man drives the pizza in his car to your location (the transfer connection). While the pizza is transferring, you can phone somebody else, like for example your garage because your own car is broken :)

### Reducing simultaneous connections for incorrectly configured servers

If you got a 421 Too many connections from this IP (<number>) error, the FTP server is restricting your number of connections. There are even servers restricting it to one connection at a time.

The preferred solution would be to contact the server administrator and encourage him/her to configure the server correctly (FTP uses more than one connection by design!). But if you need

1. Open the Site Manager (File - Site Manager... or the first toolbar button)
2. Create an entry for that server, enter all details you know, the more precise, the better
3. Open the 'Transfer Settings' tab
4. Tick the 'Limit number of simultaneous connections' checkbox
5. Enter the desired limit into the 'Maximum number of connections' field

Now, if you connect using the Site Manager entry, connections will be limited.

Note: If you limit connections to 1 only, there is a major drawback: You cannot browse the server anymore while a transfer is in progress!
